

# 29 Reasons Why Triumph Accounting POS is Best Value for Money for Your Business

1. Efficient, reliable and ergonomically designed for maximum throughput. Full integration with back-office accounting.
2. Capacity for up to 40 simultaneous users; will handle over 1 million stock items.
3. A sale may be "parked" to allow other sales to be processed immediately.
4. Lay-bys and gift vouchers are handled, including cancellations.
5. Charge sale transactions to a job/event (with Job Costing module).
6. Discount can be entered as percentage or dollar value on each line or on the total of the sale.
7. Multiple subtotals may be printed.
8. Different docket styles for cash and account sales.
9. Docket layouts can be fully customised with Crystal Reports® (sold separately).
10. Easily accept and process orders and rainchecks, even change line items at a later date.
11. 6 price lists and unlimited promotion / negotiated prices (with Special Pricing module).
12. PLU buttons can be configured with multiple levels and product images.
13. Scan pre-packaged products labelled by weight, eg. meat, fruit & veg.
14. Sale line data entry fields can be totally customised for maximum throughput.
15. Zoom functions take you directly to the stock and customer inquiry screens.
16. POS functions can be activated by touching/clicking a screen button, scanning or via a keyboard accelerator key.
17. POS transactions can be retained as long as required for reporting purposes.
18. Customer profiles and sales information may be collected at POS.
19. Customer accounts may be setup on the fly, including COD only accounts. Customer account code may be entered at any time with all discounts and prices recalculated accordingly.
20. Customers may pay off accounts at POS and receive a receipt.
21. Access to POS functions, e.g. discount given, product returns, credit limit overrides, etc is controlled by user security.
22. Supervisor overrides, based on security level, can be applied to a sale.
23. EFTPOS readers can be shared between multiple POS workstations.
24. Cash drawer journals for miscellaneous purchases and a float balance allow for accurate reconciliations.
25. No End of Day processing, postings occur as transactions are committed.
26. End of shift markers allow banking functions to occur independently of POS operations at any time.
27. Z reads and a Till Reconciliation report give complete transaction audit.
28. Comprehensive sales analysis reports with graphs.
29. Add extra POS or back office stations as needed, including new stores.

*"Our Triumph Accounting POS system is going great. It was up and running in our 8 stores in 2 weeks!"*
